!	NA black/red	!	radio
LF SPEAKI	!		amplifier in trunk
RF SPEAKI	•	ļ	amplifier in trunk
•	R black - yellow	ļ	amplifier in trunk
RR SPEAKI	ER red - white		amplifier in trunk

Notes:

NOTE: This vehicle has an immobilizer system that needs to be bypassed when adding remote start. Use DEI part number 555U. *1 These are the driver door key cylinder wires, meter the wires while turning the key in the driver door. *2 The parking lights are multiplex from the headlight switch, would have to go to each light individually to flash the lights. Better to use the hazard lights, it is yellow (-) at the center plug of the A/C display unit. *3 The fuel door release is blue/orange (-) at the release switch. *4 Extended triggers on the door lock wires will roll the windows up/down. Use validity channels to control. *5 The convertible top wires are green/yellow (-) for close and yellow/black (-) for open. They are in the driver side plug of the A/C display unit. Ignition must be on for these wires to work.
